PROFESSIONAL SUMMARY

Bringing more than 11 years of experience leading website design projects, including gathering user requirements, producing code, creating mockups, and enhancing designs. Focused on creating clean, robust code with exceptional security measures such as encryption, multi-factor authentication (MFA), and secure coding practices. Achieves compatibility targets while meeting and exceeding customer demands, and delivers both front-end and back-end development across desktop and web applications.

WORK HISTORY

Dotnet Developer, 01/2025 - Current

The Synergates Business Solutions, Karachi, Pakistan

- Working as backend developer on SBOSS ERP, and implemented couple of services including NADRA (IdVeriySys), 1LINK (Payment API), PMD (Pakistan MNP Database), and NextCert (attestation and notary for any documents on the blockchain)

Web Developer, 04/2023 – 12/2024

Aror University Sukkur, Sukkur, Pakistan

- Working as Full Stack Developer (MERN), Implemented advanced security measures including regular vulnerability assessments and the integration of security protocols. Mitigated DDoS attacks and ensured high availability of the MERN app by configuring load balancing and using cloud-based DDoS protection services.
- Managing whole process of Recruitment/Admission Tests (Admit Cards, SMSs, OMR Sheets, Attendance Sheet, and result generation (Remark Office OMR)).
- Managing Godaddy services for our university like DNS, SSL Certificates, Webhosting, and Azure VM for admission portal (MERN App) with a focus on securing domains and data encryption.
- Maintaining Moodle LMS for University (Aror University)
-

Assistant Manager IT, 03/2019 - 03/2023

Sukkur IBA University, Sukkur, Pakistan

- My core responsibilities were to maintain the four research journals of Sukkur IBA University developed in Open Journal System (OJS).
- Developed an E-Marking app using .Net Core and React JS for Punjab Examination Commission (PEC) and Sindh Education Foundation (SEF) to check students' papers online (E-Markers).
- AWS cloud services (EC2, RDS, and S3) with a focus on implementing and maintaining security policies, including IAM policies and data encryption. Implemented load balancing and DDoS protection for E-Marking solutions to ensure the system's reliability and availability during peak usage times.

Software Developer, 11/2018 - 02/2019

Mega IT Solutions, *Saddar Bank Road*, Rawalpindi, Pakistan

- The project (named Institute Affiliation System) assigned to me was for the Federal Board of Intermediate and Secondary Education (FBISE) which I had developed from scratch with the coordination of supervisor Mr. Amjad Ali Awan (CEO of Mega IT Solutions)
- We had worked with US-based companies and provided them with many solutions by using different protocols (Web APIs, REST, SSO, and so on), and integrated with government's web applications named National Insurance Producer Registry (NIPR), Interstate Background Research (IBR) and paperless solution for signatures DocuSign. Implemented secure electronic signatures using DocuSign, ensuring compliance with legal and security standards.
